

CURE XD40

INTRODUCTION

Cure XD40 is a blend of resins and surfactants emulsified in water and is specially formulated to cure freshly laid concrete. The impervious film formed by Cure XD40 prevents excessive water evaporation, promotes efficient cement hydration, minimizes shrinkage whilst increasing durability of the concrete surface.

BENEFITS

- Cures and seals
- Achieves water retention up to 80%
- Increased abrasion resistance
- Contains no wax
- Eliminates the need for curing by ponded water, damp Hessian or polythene sheeting
- Reduces concrete dusting
- Reduces plastic shrinkage
- One coat application
- Can be removed, if required, by ConClena (stripper/degreaser)
- Equipment washable in water
- Will accept other after trade

USES

Cure XD40 is suitable for curing all freshly laid concrete either smooth or textured, indoors or outdoors.

SPECIAL FEATURES

Cures and seals in one application can be over coated with other coatings.

SURFACE APPLICATION

Apply Cure XD40 to the concrete as soon as the bleed water has gone and the new concrete has hardened sufficiently so as not to be marked by the application process. Apply Cure XD40 undiluted at a rate of 1 litre per 4.5m². Best applied by spray, however, may also be applied by brush, roller or broom.
